SUREFUSER® Elastomeric Infusion System

For Veterinary Use

Features

- A lightweight, portable and disposable pump.
- Elastomeric balloon reservoir is made of an extremely safe, durable medical quality material.
- Balloon pressure stability to ensure accurate infusion.
- Thick-walled infusion line to prevent changes in flow rate, even if the infusion line is bent.
- Wide range available, offering various medication capacities and infusion rates.
- Strong protective housing to assure no leakage occurs even if the balloon breaks.
- Equipped with a self-venting 0.2-micron membrane filter to reduce priming time and eliminate air, bacteria, particulate matter, etc., from the line.
- Uses no metallic parts with uniform design and working method.
- Minimal residual volume (2 ml)
- Identification facility: color coding matching the infusion time, flow rate mentioned on the color casing.

50 ml Pump

Order No.: SFS 0505H

Flow rate - ml/Hour	Color Code	Infusion time
10	purple	5 hours

Order No.: SFS 0501D

Flow rate - ml/Hour	Color Code	Infusion time
2.1	blue	1 day

Order No.: SFS 0505D

Flow rate - ml/Hour	Color Code	Infusion time
0.4	yellow	5 days

100 ml Pump

Order No.: SFS 1012H

Flow rate - ml/Hour	Color Code	Infusion time
8.3	pink	12 hours

250 ml Pump

Order No.: SFS 10-25

Flow rate - ml/Hour	Color Code	Infusion time
10	blue	24 hours
